

Heavy Duty Vehicle Gear Oil
重负荷车辆齿轮油

GL-5

Characteristics/Performance

This grade of mineral/hydrocracked base oil and high quality additive package delivers superior anti-wear and shear stability. It significantly improves the anti-scuffing and bearing capacity of oil, and effectively lubricates and protects gear and bearing parts under severe working conditions.

Excellent thermal oxidation stability, suitable for high temperature and oxidation resistance of oil, effectively protect gear and other parts to work normally for a long time at high temperature.

It has good flow ability and oil solubility, which makes the gear work quietly and smoothly.

Excellent anti-foaming property, ensures smooth power transmission and prevents damage of shaft surface.

Resistant to oxygen, anti-rust and anti-rust performance, long service life and extended overhaul period.

Range of Application

It is suitable for gear lubrication and protection of manual gearbox, etc. It can be used for the gear of various construction machinery and heavy trucks and other under heavy load, heavy load, low speed and high torque.

NOTE

SHOULD BE USED WITH THE FOLLOWING OILS:
SAE 15W-40, 15W-50, 15W-60, 15W-70, 15W-80, 15W-90, 15W-100, 15W-110, 15W-120, 15W-130, 15W-140, 15W-150, 15W-160, 15W-170, 15W-180, 15W-190, 15W-200, 15W-210, 15W-220, 15W-230, 15W-240, 15W-250, 15W-260, 15W-270, 15W-280, 15W-290, 15W-300, 15W-310, 15W-320, 15W-330, 15W-340, 15W-350, 15W-360, 15W-370, 15W-380, 15W-390, 15W-400, 15W-410, 15W-420, 15W-430, 15W-440, 15W-450, 15W-460, 15W-470, 15W-480, 15W-490, 15W-500, 15W-510, 15W-520, 15W-530, 15W-540, 15W-550, 15W-560, 15W-570, 15W-580, 15W-590, 15W-600, 15W-610, 15W-620, 15W-630, 15W-640, 15W-650, 15W-660, 15W-670, 15W-680, 15W-690, 15W-700, 15W-710, 15W-720, 15W-730, 15W-740, 15W-750, 15W-760, 15W-770, 15W-780, 15W-790, 15W-800, 15W-810, 15W-820, 15W-830, 15W-840, 15W-850, 15W-860, 15W-870, 15W-880, 15W-890, 15W-900, 15W-910, 15W-920, 15W-930, 15W-940, 15W-950, 15W-960, 15W-970, 15W-980, 15W-990, 15W-1000.

Chemical/Physical Performance

The product is refined to achieve low-temperature start-up, improved performance, low-temperature start-up, and low-temperature start-up.

The product can be used for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.

The product is suitable for low-temperature start-up and low-temperature start-up.
